Programme information for 2023-24

ENTERPRISE TECH

Entrepreneurship training designed for science-minded researchers and the next generation of innovators.

Entrepreneurship
Centre

UNIVERSITY OF
CAMBRIDGE
Judge Business School

Entrepreneurship education & training for researchers.

Are you a researcher interested in exploring entrepreneurship, or are you considering an innovative idea that you want to transform into a new business?

Our interrelated programmes EnterpriseTECH and EnterpriseTECH STAR are designed for individuals like you. Both 10-week programmes run in extracurricular mode, so you can fit them around your studies, research or day job. You don't have to be at Cambridge to join us.

EnterpriseTECH: No business idea? No problem.

EnterpriseTECH is an immersive learning experience shared with 60 people (per cohort) from a range of research backgrounds.

By way of an intensive four-day lecture series, hands-on workshops, supervisions, and practical application to real-world projects, we help you build versatile entrepreneurship skills and valuable enterprise networks, enabling you to thrive in today's entrepreneurial landscape.

The programme runs twice each academic year. Entry is by online application and informal interview. You don't need your own business idea to join us or prior business knowledge and you'll work as part of a team and learn together.

The early-stage technologies selected as commercial feasibility projects for teams to work on are usually STEM-focussed (areas suited to our cohorts). You can see titles of some of our past projects here.

Our students are researchers passionate about making a difference in the world. They're driven by a desire to find solutions to global problems and view entrepreneurship as a potential means to focus their research and career pursuits.

EnterpriseTECH STAR: Progress your business idea

EnterpriseTECH STAR, launched in 2019 is designed for (up to 20) EnterpriseTECH alumni seeking to turn research or ideas into businesses aligned with UK Research & Innovation missions.

Presented every 18-24 months, the programme involves interactive talks, workshops, and tasks that run on alternate weeks. You will also get personalised mentoring with experienced coaches who will help you develop professionally and personally as an individual and entrepreneur.

The programme helps you build a first narrative around your business idea, flesh out the substance and details, and prepare for applying to accelerators, competitions or pre-seed funding. You can read about the experiences of our alumni who founded numerous companies here.

Opportunity for inventors.

If you are an inventor working on an early-stage new technology, get involved by submitting a commercial feasibility project proposal. If selected, it would be run through the programme for a student team to work on.

Proposal submission deadlines are the same as student application deadlines.

EnterpriseTECH Cohort 13
26 September to 8 December 2023.
Application deadline: **17 July 2023**.

EnterpriseTECH Cohort 14
Programme: 9 January to 22 March 2024.
Application deadline: **30 October 2023**.

EnterpriseTECH STAR Cohort IV
Programme:10 April to 17 June 2024.
Application deadline: **10 January 2024**.

EnterpriseTECH programme fee for University of Cambridge and affiliated institutions: £670. See here for more information and scholarships.
